

CAPABILITY STATEMENT

Solar Energy Specialists

Who Are We?

Santrev Solar is the company Australian poultry growers choose for their commercial solar solutions

Building upon Santrev's long-established reputation for excellence in poultry growing and shed construction, Santrev Solar was established by Luke Trevanion and Justin Brown to address the escalating energy costs confronting poultry farmers'. This is achieved through the introduction of highly cost-effective "turnkey" solar solutions with potential investment payback periods of 3.5 – 4 years fully project managed end-to-end.

Who Are We?

As a grower himself, Luke and his business partner Tony Young were so convinced of the investment returns available from solar energy conversion they went ahead and installed a 340kw system on their poultry operations in Western Australia.

Santrev Solar and its partner, Solar Choice provides its clients full “turnkey” solutions, project managed for both brown and greenfield poultry operations across Australia and New Zealand.

Our People

Luke Trevanion – Executive Director

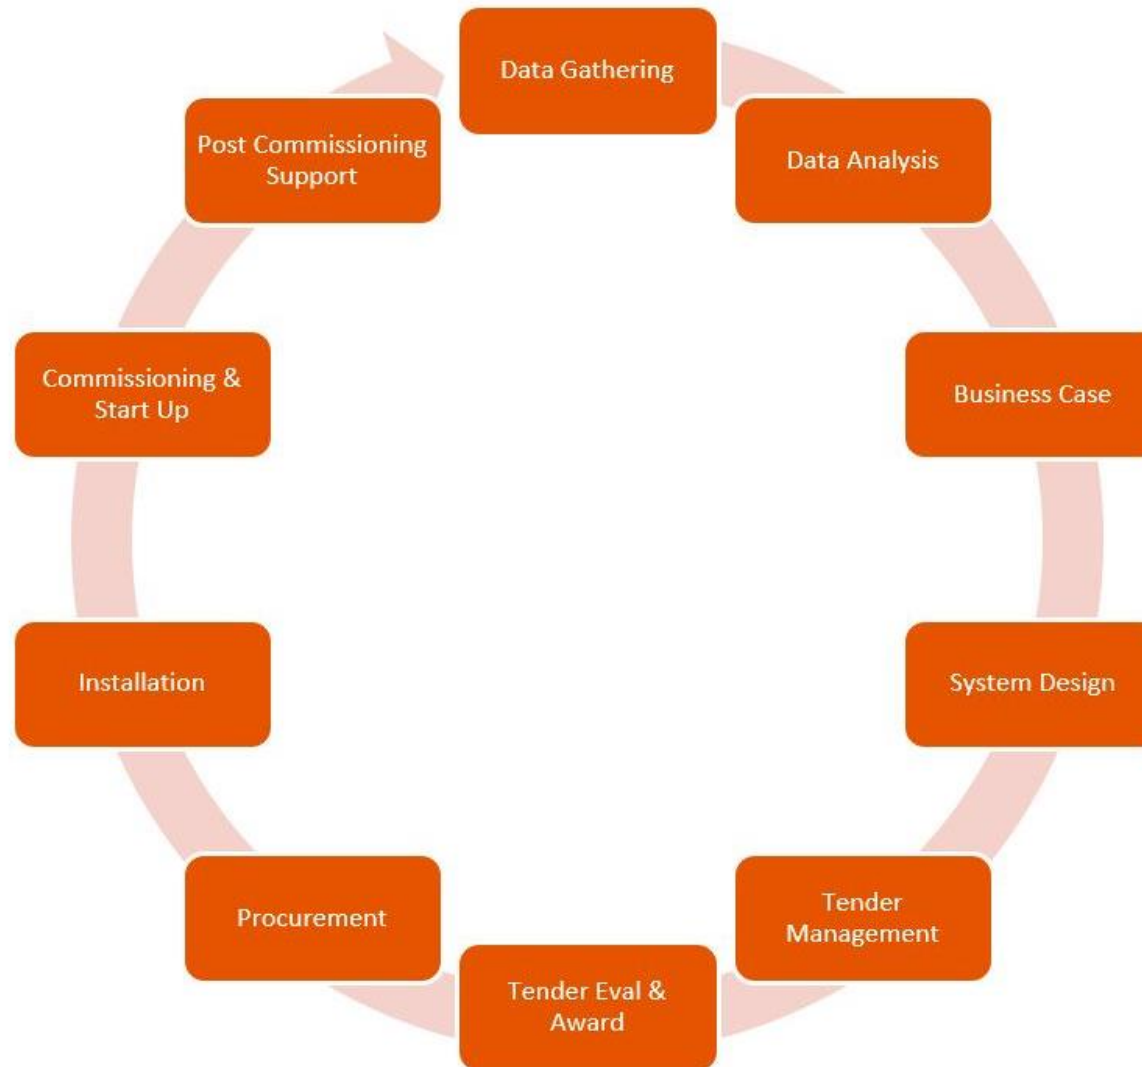

Luke is well known in the poultry industry as a successful grower and leader in cutting edge shed design across Australia and New Zealand through his construction company Santrev. To demonstrate his broader commitment to innovation in the Poultry sector, Luke partnered with Justin Brown to establish Santrev Solar. Luke was so convinced by the investment returns available from solar energy, he commissioned the conversion of his joint operations in Western Australia to solar energy and is looking forward to an investment rate return of 28.5% and payback in 3.5 years.

Justin Brown – Chief Executive Officer

Justin is an accomplished Project Manager with 20 years' experience leading projects across health, oil and gas, coal mining, transport logistics, rail and steel making industries in the UK, Australia, and New Zealand. Justin is passionate about identifying, scoping and introducing innovative technologies into mature industrial and agricultural markets. Justin is keen to lead the conversion of the poultry sector to solar energy sourced power helping farmers take back control of their energy costs, improve operational profitability and reduce their greenhouse gas emissions. Justin leads the sales and project delivery aspects of the business and enjoys engaging with clients by starting a conversation to understand their needs and objectives for improved energy outcomes.

Hear what our clients and suppliers have to say about us !

“As energy costs continue to rise, Solar power could potentially deliver long term cost savings to our business. Our suppliers have designed the solar system to suit our business needs and size, using top quality products with comprehensive warranties. We are looking at a payback period of 3.58 years. Investing in solar power not only reduces monthly operating costs and improve margins but helps us being environmentally and socially responsible. A business’ decision to go solar is both gain and give situation”

Moreen Manjita
Administration
Western Australia

“By investing in solar can help our business in many ways. First, and most importantly, we could boost our bottom line with savings on electricity and operating costs. Our system designers have advised that day time running cost can be greatly reduced as well as lowering demand charges for the size of business we operate. Going Solar isn’t just a financial decision, we are responsible for the influence we have on the environment, switching our business to the commercial solar panel strengths our commitment. Solar panel systems are a smart capital investment for any business. They have short term payback period, provide steady financial return and very little ongoing maintenance.”

Tony Young
Director – Western Riverlands Poultry
